

Cambridge-Tokyo Frontiers in Molecular and Cellular Biology

LOCATION: Lecture Theatre, Dept of
Pathology, 10 Tennis Court Road, Cambridge
DATE: 25 September 2026
TIME: 09:00-12:00
ZOOM: Meeting ID: 894 6562 0703;
Passcode: 884974

09:00-09:05	Welcome and Session Framing	Dr. Betty Chung, Department of Pathology, Cambridge
09:05-09:50	Part I Talks Each speaker will present for 12 minutes, followed by a 3-minute Q&A session.	Chaired by Prof. Taisuke Tomita, Graduate School of Pharmaceutical Sciences, UTokyo.
	Latent Structures in Drug-Related Life Science Data	Dr. Tadahaya Mizuno, Graduate School of Pharmaceutical Sciences, UTokyo
	Integrating mechanistic and data-driven models for pharmaceutical process development	Dr. Sara Badr, Dept. of Chemical System Engineering, UTokyo
	AI and Quantum-Inspired Approaches in Novel Target Discovery for High Unmet Needs Through Multi-Omics Integration	Prof. Namshik Han, Milner Therapeutics Institute, Cambridge
09:50-10:15	Coffee/Tea break	
10:15-11:30	Part II Talks Each speaker will present for 12 minutes, followed by a 3-minute Q&A session.	Chaired by Dr. Betty Chung, Department of Pathology, Cambridge
	Structural study of RNA-sensing Toll-like receptor	Prof. Toshiyuki Shimizu, Graduate School of Pharmaceutical Sciences, UTokyo
	Molecular Mechanisms Underlying the Physiological Functions of Ribosome Collision Surveillance and Translational Quality Control	Prof. Toshifumi Inada, Institute of Medical Science, UTokyo
	From Discovery to Application: Turning Translation Mechanisms into Technology	Dr. Betty Chung, Department of Pathology, Cambridge
	Engineering microbes for biological textile dyeing	Dr. Jim Ajioka, Department of Pathology, Cambridge
	Plant-virus symbioses: Can a virus become a mutualist?	Prof. John Carr, Department of Plant Sciences
11:30-11:50	Joint Discussion: Cambridge-UTokyo Collaboration Opportunities	All
11:50-12:00	Closing Remarks	Prof. Taisuke Tomita, Graduate School of Pharmaceutical Sciences, UTokyo
